EXPERIMENT Tittle ADVACED SUB ARRAY PROBLEM ADVACED SUB ARRAY PROBLEM ARRAY PR	138kir
You are competing in a basketball contest. In this contest the score for each successful shape of the score for each score for each successful shape of the score for each	not depends on both the You are given an array A
distance from the basket and the player's position. The ball is shot N times, successfully. containing the distance of a player from basket for N shots. The index of array represents	You are given an array A the position of the player.
Score is calculated by multiplying the position with the distance from the basket. Your task is to find and return an integer value, representing the maximum possible score	
Your task is to find and return an integer value, representing the maximum possible score a contiguous subarray of size K from the given array.	you can achieve by choosing
Note:	
Note: * A subarray is a contiguous part of array.	, of
* Assume 1 based indexing.	,00910
* The array contains both negative and positive values.	
* Assume the player is standing on a cartesian plane.	38EV
Input Format	3♥
- input1:An integer value N representing the number of shots made by the player - input2: An integer K representing the size of subarray	
- input2 : An integer K representing the size of subarray	13c10°
- input3 : An array of integers	L'3
Sample Input 5
